

### *Our Unit.*

At **Centro Gutenberg Reproduction Unit** we have been performing Assisted Reproduction Techniques and providing comprehensive gynecological care to women since 1987. With over 35 years of experience, we carry out all types of fertility treatment, from the most straightforward to the most sophisticated, constantly investing in cutting-edge technology to improve success rates, and always up-to-date on human reproduction.

Our eagerness to improve the way we manage ourselves thus led us, in 2006, to obtain and maintain external accreditation of our quality management system in accordance with standard **UNE-EN ISO 9001**.

### *Our Commitment.*

Providing **our patients** with the best care, both in diagnosis and medical treatment as well as in the emotional aspect. We work with people who have fertility issues. For that reason, we want to offer not only the best treatment but also all possible support.

Continuously updating, maintaining and improving our **quality management** system to fully meet our patients' expectations and increase the efficiency of our Unit's working practices.

Providing steady and secure work to **our staff**, offering continuous and up-to-date training in response to the professional interests of all staff members and encouraging team work as well as employee participation in organizing it.

Analyzing the risks and opportunities of our activity, in such a way that it allows us to take decisions to address them in order to achieve the expected results, minimizing or eliminating undesirable results in our activity and management.

Working in harmony with the **environment** and complying at all times with the **current legislation** applicable to our activities and services.

**The Management.**
